Saturday morning Secretaries Fisher and Rundin, of the Commercial Clubs of Alliance and Crawford, respectively, will leave Alliance for Crawford, marking the entire road between these two cities. Iron posts will be erected, wooden stakes put down where needed, and everything possible will be done to mark the road making it possible for all strangers traveling via this Black Hills Loop to find the way. Secretary Rundin also is planning to mark the road between here and Hot Springs via the new road at the state line connecting there with Hot Springs. When it is done the entire road between Deadwood and Denver will be properly marked. Much credit is due the Associated Commercial Clubs of Western Nebraska.

A visitor was being shown thru the hospital for insane at Lincoln when the attendant said: "This is the automobile department. Do you know there are 97 stark-raving automobile maniacs in there." "But," said the visitor, looking in amazement, "I can only count six in there." "Well, the remaining 91 are all under the beds trying to find out why the blamed things won't run," said the attendant.—Ex.

Did you ever notice that if you place the transmitter of the telephone against your chest, instead of your mouth, it makes no apparent difference to your auditor? If you are talking over a desk instrument, it is often easier to hold it against the chest than to your mouth. Simply hold the transmitter to your chest and talk into the open air. The entire chest wall vibrates in unison with the voice and will transmit the sound vibrations over the telephone as well as your voice.—Ex.

All right, gentlemen; come right along; but as June 6 happens to be Sunday you may find all the Bridgeport fellows at church. However, seats will be reserved for the Alliance brethren at all places of worship, and the preachers will be instructed to pray for the visitors with all the eloquence at his command. Over 90 per cent of Business Men Fail

Men fail in business because they do not know the game. They lack system and a thorough knowledge of their business. The reason why so many would-be farmers fail is because they know little or nothing of the science of farming. They think anybody can farm and then are surprised to find that their crops will not grow. The farmer who is always behind, who always has bad luck with his crops, is the man who farms by guess and trusts to luck. If he were in the mercantile business he would be in the hands of a receiver within a year. He is a failure but he hangs on because the poorest farmer can get a living out of the land if he only plows and sows the seed.

An Agricultural Education

The first thing a young man who intends to go into business should do is to take a course in a business college. Here he can become familiar with the first principles of business, without which he will fail. The first thing a man who expects to farm should do is to take a course in an agricultural college, if he can, but if he has not the time or the money to spend in a two-year course, he can get the same instruction at home by taking a course in the Campbell Correspondence School of Soil Culture. Everything is furnished—books and all—at a very slight cost, and the best thing about it, he does not have to leave the farm or his work.

He can choose from the following courses:

Soil Improvement Course	Cereal Culture Course
Horticultural Course	Dry Farming Course
Small Farming Course	Farm Engineering Course
	Soil Tillage Course

Summer is the time to study agriculture, and the farm and garden is the laboratory in which to work out the problems. Don't wait for fall or winter to begin, but get busy now. You will learn more in one summer applying your instruction in the fields than in a dozen winters sitting by the fire. Send for our catalog Number 3. It will not cost you a cent.
